Symptom

Table CGEV reserves too much space in company database.

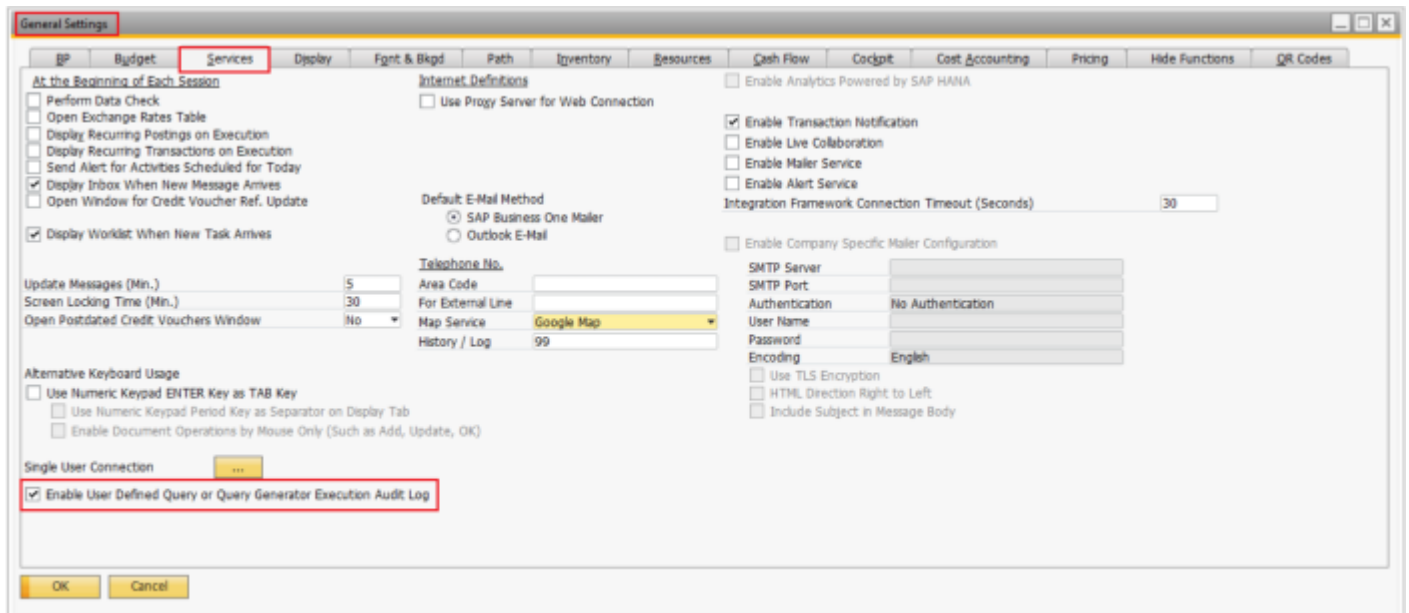

Reproducing the issue

Scenario:

- You are using SAP Business One 10.0 FP 2011 or a higher version.
- There are some user queries in your company database, and you change and execute the user queries many times in your daily work.

Expected behavior:

Enable an option to turn off to write record in table CGEV in the SAP Business One client *Administration* → *System Initialization* → *General Settings* → *Services* tab page. And by default, this option is turned on.

Actual behavior:

Table CGEV reserved too much space in company database after you change and execute the user queries many times in your daily work.

Solution

SAP intends to provide a feature package or patch to solve the symptom that is described in this SAP Note. The section **References** below lists the related feature package or patch once they become available. Be aware that **References** can only be confirmed at feature package or patch release date. SAP delivers feature packages or patches only for selected releases at its own discretion, based on the business impact and the complexity of implementation.

Products

SAP B1 10.0 FOR SAP HANA
SAP BUSINESS ONE 10.0
